T/A EYG Commercial**

**Health & Safety Policy**

It is our Company policy to ensure all possible steps are taken to ensure the health and safety of all persons who may be affected by our activities. To achieve this, the Company will:

- Provide a healthy and safe working environment for its employees
- Provide equipment that is suitable and without risks for use at work
- Provide training, instruction, information and supervision to our employees to enable them to carry out their job competently and safely
- Provide safe systems of work for its employees, including the provision of Personal Protective Equipment where required
- Seek to communicate effectively on all issues concerning health and safety
- Monitor the implementation and effectiveness of the policy, methods and systems, and by a process of constant improvement, will seek to maintain high standards of health and safety
- Review the policy as necessary and at the very least, on an annual basis
- Liaise with and obtain specialist health and safety guidance from external health and safety advisors if required.

The Company recognises that the effective implementation of this policy depends on the cooperative efforts of all, including Managers, employees and subcontracted labour.

## Health & Safety Responsibility and Resourcing

At EYG Commercial, we recognise our duty to protect the Health and Safety of all employees including other contractors' employees, as well as any members of the public who might be affected or come into contact with the company's many operations.

To achieve this, EYG Commercial have recognised the need to have an effective occupational Health and Safety management system in place, which is clearly defined, well documented and adequately resourced, financially and physically.

Our Health and Safety management system embodies the principle of continual improvement as exemplified in the British Standard for quality assurance systems.

Our factory and site managers have completed recognised Health and Safety training courses by IOSH and CITB, to ensure that policies and procedures are agreed upon by our Health & Safety committee who ensure these are followed throughout the organisation. Our manufacturing and installation sites are also audited regularly providing detailed reports including any non-conformance actions and recommendations.

Organisation and planning play a big part in accident reduction and the successful delivery of any project, so the company also operates a fully documented Quality Management System, which is accredited to the ISO 9001 2015 standard.

EYG Commercial is also an approved member of Construction Line Advanced and the Contractors Health and Safety Assessment Scheme (CHAS) additionally EYG maintains SMAS, FENSA and Alcumus Safe Contractor accreditations.

These systems have enabled EYG Commercial to consistently reduce accidents throughout the group whilst ensuring that we provide quality products manufactured to the highest possible standard, installed by competent, trained tradespeople and backed up by industry-recognised certifications, guarantees and warranties.

### RESPONSIBILITY FOR HEALTH AND SAFETY SYSTEMS THEIR DELIVERY AND RESOURCING
